RESTRICTION RESPONSE

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

In response to the Office Action dated November 1 2004, Applicants herein elect group I corresponding to claims 1-23, drawn to an onboard fuel cell system, classified in class 429, subclass 34, **with traverse** for prosecution in the present application.

Applicant traverses the outstanding Restriction Requirement as the outstanding Restriction Requirement has not established that an undue burden would be required if the Restriction Requirement was not issued and if all the claims were examined together. More particularly, MPEP §803 states:

If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits, even though it includes claims to independent or distinct inventions.

Application No. 10/050,866
Reply to Office Action of November 18, 2004

In the present application any search of the elected device claims would also include the classes and subclasses appropriate for searching the method claims, and so then would be no undue burden if all of the claims were examined together.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
